

Update on the Dengue Situation in the Western Pacific Region & the Americas

This report describes the epidemiology of dengue in the **World Health Organization** Western Pacific Region and the Americas. [Western Pacific region data](#) are compiled from open sources (national indicator-based surveillance systems) with the exception of Cambodia, Lao People's Democratic Republic, Viet Nam, and the Philippines, where data are provided from WHO Country Offices, and for Pacific Island Countries, where syndromic surveillance data are provided by **WHO's Division of Pacific Technical Support**. Data from the Americas are drawn from the **Pan American Health Organization's** [PLISA Health Information Platform for the Americas](#). Data for Indonesia, Thailand, and Myanmar are drawn from **ASEAN Biodiaspora Virtual Center's** [weekly reports](#). Information is reported based on countries' standard dengue case definitions. Due to differences in surveillance methods and reporting practices, a comparison of trends between countries and areas is not possible, however national trends can be observed over time.

Follow us on:

Western Pacific - Northern Atmosphere

Cambodia

As of Week 43 of 2023, 996 cases with 0 deaths were reported, for a total of 27,908 cases and 39 deaths to date.

China

As of Week 50 of 2023, 5,388 cases with 1 death were reported, for a total of 17,788 cases and 1 death to date.

Indonesia

During epidemiological Week 47 of 2023, there were 5,093 dengue cases reported. 16 dengue-related deaths were reported in Week 40. The cumulative number of dengue cases reported to date is 83,302 cases. As of epidemiological Week 47, a total of 633 deaths due to dengue have been reported.

Laos PDR

In Week 49 of 2023, 263 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 49) is 31,615. There have now been 20 deaths reported in 2023.

Malaysia

In Week 48 of 2023, 2,988 dengue cases and 1 death were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 48) is 111,417. There have now been 84 deaths reported in 2023.

Myanmar

As of Week 28 of 2023, 4,968 cases with 23 deaths were reported, for a total of 6,685 cases and 30 deaths to date.

Philippines

As of epidemiological Week 43 of 2023, 2,578 dengue cases were newly reported, leading to a total of 167,355 cases. 31 dengue-related deaths were reported this week, for a total of 575 dengue-related deaths to date.

Singapore

During epidemiological Week 49 of 2023, there were 183 dengue cases reported. 0 dengue-related deaths were reported in Week 49. The cumulative number of dengue cases reported to date is 9,227 cases. As of epidemiological Week 49, a total of 0 deaths due to dengue have been reported.

Thailand

During epidemiological Week 47 of 2023, there were 3,064 dengue cases reported. 32 dengue-related deaths were reported in Week 47. The cumulative number of dengue cases reported to date is 139,719 cases. As of epidemiological Week 47, a total of 151 deaths due to dengue have been reported.

Viet Nam

In Week 46 of 2023, 5,903 dengue cases and 1 death were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 50) is 149,557. There have now been 36 deaths reported in 2023.

Western Pacific – Southern Atmosphere

Australia

In Week 47 of 2023, 46 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 50) is 962. There have now been 0 deaths reported in 2023.

Cook Islands

As of epidemiological Week 17 of 2022, 4 dengue cases were reported, leading to a total of 23 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

French Polynesia

There were 0 dengue cases reported in 2023. 0 dengue-related deaths were reported.

New Caledonia

As of Week 38 of 2023, 0 cases with 0 deaths were reported, for a total of 4 cases and 0 deaths to date.

Wallis and Futuna

There were 0 dengue cases reported in 2023. 0 dengue-related deaths were reported.

The Americas

Antigua and Barbados

In Week 44 of 2023, 0 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 44) is 45. There were 0 deaths reported in 2023.

Argentina

As of epidemiological Week 50 of 2023, 835 dengue cases were newly reported, leading to a total of 126,430 cases. 0 dengue-related deaths were reported this week, for a total of 68 dengue-related deaths to date.

Aruba

As of Week 40 of 2023, 11 cases with 0 deaths were reported, for a total of 21 cases and 0 deaths to date.

Bahamas

As of Week 48 of 2023, 8 cases with 0 deaths were reported, for a total of 239 cases and 1 death to date.

Barbados

During epidemiological Week 46 of 2023, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 46. The cumulative number of dengue cases reported to date is 1,126 cases. As of epidemiological Week 46, a total of 0 deaths due to dengue have been reported.

Belize

As of epidemiological Week 49 of 2023, 2 dengue cases were newly reported, leading to a total of 1,574 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Bermuda

As of Week 44 of 2023, 0 cases with 0 deaths were reported, for a total of 1 case and 0 deaths to date.

Bolivia

During epidemiological Week 50 of 2023, there were 520 dengue cases reported. 0 dengue-related deaths were reported in Week 50. The cumulative number of dengue cases reported to date is 146,776 cases. As of epidemiological Week 50, a total of 88 deaths due to dengue have been reported.

Brazil

During epidemiological Week 50 of 2023, there were 13,045 dengue cases reported. 0 dengue-related deaths were reported in Week 50. The cumulative number of dengue cases reported to date is 2,971,740 cases. As of epidemiological Week 50, a total of 1,074 deaths due to dengue have been reported.

Canada

During epidemiological Week 51 of 2023, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 51. The cumulative number of dengue cases reported to date is 0 cases. As of epidemiological Week 51, no deaths due to dengue were reported.

Cayman Islands

During epidemiological Week 40 of 2023, there were 15 dengue cases reported. 0 dengue-related deaths were reported in Week 40. The cumulative number of dengue cases reported to date is 15 cases. As of epidemiological Week 40, no deaths due to dengue have been reported.

Chile

As of Week 35 of 2023, 57 cases with 0 deaths were reported, for a total of 57 cases and 0 deaths to date.

Colombia

As of Week 51 of 2023, 3,922 cases with 0 deaths were reported, for a total of 127,925 cases and 90 deaths to date.

Costa Rica

As of Week 49 of 2023, 856 cases with 0 deaths were reported, for a total of 31,264 cases and 0 deaths to date.

Cuba

As of Week 26 of 2023, 2,586 cases with 1 deaths were reported, for a total of 3,036 cases and 1 death to date.

Dominican Republic

In Week 48 of 2023, 9,661 dengue cases and 7 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 48) is 28078. There have now been 26 deaths reported in 2023.

Ecuador

As of epidemiological Week 43 of 2023, 684 dengue cases were newly reported, leading to a total of 22,749 cases. 1 dengue-related deaths were reported this week, for a total of 25 dengue-related deaths to date.

El Salvador

In Week 49 of 2023, 97 cases with 0 deaths were reported, for a total of 5,657 cases and 0 deaths to date.

Grenada

In Week 51 of 2023, 4 cases with 0 deaths were reported, for a total of 621 cases and 1 death to date.

Guadeloupe

In Week 49 of 2023, 315 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 49) is 11,156. There have now been 7 deaths reported in 2023.

Guatemala

As of Week 50 of 2023, 1,141 cases with 0 deaths were reported, for a total of 69,973 cases and 97 deaths to date.

Guyana

As of Week 16 of 2023, 87 cases with 0 deaths were reported, for a total of 92 cases and 0 deaths to date.

Honduras

As of Week 49 of 2023, 1,394 cases with 7 deaths were reported, for a total of 31434 cases and 38 deaths to date.

Jamaica

During epidemiological Week 47 of 2023, there were 3,191 dengue cases reported. 3 dengue-related deaths were reported in Week 47. The cumulative number of dengue cases reported to date is 5,754 cases. As of epidemiological Week 47, a total of 5 deaths due to dengue have been reported.

Martinique

As of Week 46 of 2023, 580 cases with 0 deaths were reported, for a total of 10,919 cases and 6 deaths to date.

Mexico

As of Week 51 of 2023, 4,036 cases with 0 deaths were reported, for a total of 274,357 cases and 203 deaths to date.

Montserrat

During epidemiological Week 44 of 2023, there were 2 dengue cases reported. 0 dengue-related deaths were reported in Week 44. The cumulative number of dengue cases reported to date is 4 cases. As of epidemiological Week 44, a total of 0 deaths due to dengue have been reported.

Nicaragua

During epidemiological Week 50 of 2023, there were 4,115 dengue cases reported. 0 dengue-related deaths were reported in Week 50. The cumulative number of dengue cases reported to date is 173,147 cases. As of epidemiological Week 50, a total of 4 deaths due to dengue have been reported.

Panama

As of epidemiological Week 47 of 2023, 711 dengue cases were newly reported, leading to a total of 16,774 cases. 3 dengue-related deaths were reported this week, for a total of 13 dengue-related deaths to date.

Paraguay

During epidemiological Week 51 of 2023, there were 2,156 dengue cases reported. 5 dengue-related deaths were reported in Week 51. The cumulative number of dengue cases reported to date is 16,414 cases. As of epidemiological Week 51, a total of 23 deaths due to dengue have been reported.

Peru

During epidemiological Week 49 of 2023, there were 1,662 dengue cases reported. -6 dengue-related deaths were reported in Week 49. The cumulative number of dengue cases reported to date is 273,676 cases. As of epidemiological Week 49, a total of 444 deaths due to dengue have been reported.

Puerto Rico

During epidemiological Week 48 of 2023, there were 161 dengue cases reported. 0 dengue-related deaths were reported in Week 48. The cumulative number of dengue cases reported to date is 1,031 cases. As of epidemiological Week 48, a total of 0 deaths due to dengue have been reported.

Saint Barthelemy

In Week 49 of 2023, 91 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 49) is 673. There have now been 0 deaths reported in 2023.

Saint Kitts and Nevis

During epidemiological Week 51 of 2023, there were 18 dengue cases reported. 0 dengue-related deaths were reported in Week 51. The cumulative number of dengue cases reported to date is 279 cases. As of epidemiological Week 51, 1 death due to dengue has been reported.

Saint Lucia

As of Week 50 of 2023, 0 cases with 0 deaths were reported, for a total of 60 cases and 0 deaths to date.

Saint Martin

As of epidemiological Week 49 of 2023, 235 dengue cases were newly reported, leading to a total of 1,167 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Saint Vincent and the Grenadines

In Week 40 of 2023, 0 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological **Week 40**) is 15. There have now been 0 deaths reported in 2023.

Sint Maarten

In Week 36 of 2023, 1 dengue case and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological **Week 36**) is 1. There have now been 0 deaths reported in 2023.

Suriname

As of epidemiological Week 46 of 2023, 18 dengue cases were newly reported, leading to a total of 239 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Trinidad and Tobago

As of epidemiological Week 36 of 2023, 32 dengue cases were newly reported, leading to a total of 132 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Turks and Caicos Islands

As of Week 44 of 2023, 75 cases with 0 deaths were reported, for a total of 93 cases and 0 deaths to date.

United States

As of epidemiological Week 51 of 2023, 0 dengue cases were newly reported, leading to a total of 1,472 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Uruguay

As of Week 49 of 2023, 0 cases with 0 deaths were reported, for a total of 44 cases and 0 deaths to date.

Venezuela

In Week 21 of 2023, 384 dengue cases and 2 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological Week 21) is 4,809. There have now been 8 deaths reported in 2023.

Virgin Islands UK

As of epidemiological Week 40 of 2023, no dengue cases were reported, leading to a total of 5 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Virgin Islands US

In Week 51 of 2023, 0 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2023 (as of epidemiological **Week 51**) is 0. There have now been 0 deaths reported in 2023.
